Plant The Perfect Smile With Dental Implants

Have you lost a tooth or more and there is a gap in your smile? Are you suffering while eating your favorite food because of missing teeth? Maybe you've tried some procedures like dentures but it didn't work? Don't lose hope, you may want to consider dental implants. Unlike typical dentures and bridges, it's life time lasting!

Dental implants are made of titanium and other materials that are well accepted in your body , and it can replace a single tooth or several teeth. The average of success is pretty high. According to the American Association of Oral & Maxillofacial Surgeons (AAOMS), it's more than 95% effective ,and more than 5 million implants are placed each year in the USA .

The Dental Implant Treatment : What's Involved?

Once you visit your dentist, he will order some X-rays or other pictures to know the structure of your jaw and to place the Implant in the right position carefully by a simple surgical procedure under local anesthesia. After the procedure you may have some swelling and/or tenderness, your dentist may prescribe pain medicine to ease the discomfort. During the healing process, your dentist may tell you to eat soft foods. The healing process may takes several months where your jawbone grows around the implant and become stronger.

You'll need to keep up with a superb oral health routine. You must brush your teeth twice a day, clean between your teeth once a day with floss or a water flosser, and regularly visit your dentist.

Not Only The Smile , But Your Whole Lifestyle

Dental implant feels like a normal tooth, it can do wonders for your self-esteem! Beyond aesthetics, a dental implant helps you with daily activities, like eating and speaking. Also it's more firm than typical dentures or bridges.
